

### **Visipro's High Visibility Protection**

VisiPro will showcase the VisiPro™ high visibility pallet racking upright protector at Sydney Materials Handling. The protector is designed to reduce the damage resulting from impacts caused during loading and loading of racking.

With superior rack protection properties at 30% of the cost of existing market players, the VisiPro aims to revolutionise the rack protection market. It uses a simple clipping system to ensure fast installation, and has a narrow width so as to provide protection without reducing the clear entry of the pallet into the racking bay.

Injection moulded from a high impact plastic compound that distributes the collision load to an internal energy absorbing pad, VisiPro is coloured in a high visibility fluoro yellow.
